

# Twister Spa Treatment for Windshields

Package includes:

Item 1a – Sponge pad (Coarse side)

Item 1b – Sponge pad (Soft side)

Item 2 – 3M Microfine sanding sponge

Item 3 – Treatment powder

## Application

1. Lift wipers off windshield
2. Wet windshield surface with plain tap water. If tap water is hard, use distilled water instead.
3. Clean windshield with a mild detergent (e.g. Dawn) with item 1a to wash windshield removing excess wax, grime, dirt and contaminants. (Fig. 1)
4. Rinse off with plain water.
5. Use item 2 on wet windshield to smooth surface \*Windshield surface must remain wet during this step.
6. Apply item 3 with a damp item 1b on windshield in circular motion \*Windshield must be kept damp during this step. (Fig. 2)
7. Continue step 6 throughout entire windshield and leave for 10 minutes. (Fig. 3)
8. Rinse windshield with plain water.
9. Repeat step 5.
10. Rinse with plain water
11. The Windshield Spa treatment is complete, water will not bead on windshield if correctly applied.

Notes:

1. Do not use ammonia based glass cleaners on windshield, the ammonia deteriorate wipers and cause squeaks and judders.
2. Do not apply water repellents or wax on windshield as it causes wiper judders.
3. Use plain water in washer reservoir when possible.
4. Avoid using windshield sponge and squeegee at gas stations as they are likely to be contaminated.
5. Do not use clay bar on windshields, the claybar leaves a layer of lubricant film that causes wiper judders.
6. Use plain water to wash windshield when possible.
7. For best performance, use Twister 100% Silicone wiper Blades after Spa treatment.
